

Virtual EXPO FAQs

1. We are using PheedLoop, virtual event management software, for the virtual EXPO. Check out this tutorial - <https://pheedloop.com/more/virtual-exhibitor-training>
2. Each exhibitor will have a virtual booth where they will be able to upload pictures and/or videos, interact with shoppers, link to their website, and more. Vendor booths will be available for set-up beginning November 15, 2020. The space will be active through August 31, 2021.
3. It is recommended that you use a computer (not a tablet) to set up your virtual booth.
4. The EXPO will provide assistance setting up your booth, but you should be comfortable using a computer.
5. EXPO staff will be available remotely on the day of the EXPO. Exhibitors will be at their own remote location.
